

Fast and accurate sampling in the field

Fluid Transfer Management's new live sampling box allows you to check the quality of fluids anywhere, anytime.

Because the vehicle or equipment is running at the time of sampling, and the fluid is up to temperature and properly mixed, you get a highly accurate sample.

And because sampling is done in the field, there's minimal downtime and disruption to production schedules.

Ideal for earthmoving and mining equipment

The live sampling box is designed to suit most medium to large machines and can be installed at a number of convenient positions on the machine.

The box can be supplied as is or complete with hoses, fittings and mountings.

Fluid Transfer Management

How to Order your Live Sampling Box

To select a Live Sampling Box to your specifications, please refer to the ordering code information below:

LSB	-	L	Number of Ports		-	Fluids to be Tested (Maximum 6)		Hose Kit		-	Hour Meter	
			1	1 Port		A	Engine	N	No		N	No
			2	2 Ports		B	Hydraulic	Y	Yes		Y	Yes
			3	3 Ports		C	Transmission					
			4	4 Ports		D	Coolant					
			5	5 Ports		E	Steering					
			6	6 Ports		F	Compressor					
						G	PTO					
						H	Crusher Lube					
						J	Pump Drive					
						K	Brakes					
						L	Drop Box					
						O	Other - Customer to specify					

Example: To order a Live Sampling Box with 3 ports; to test engine, coolant and PTO fluids; with a hose kit but without an hourmeter, the ordering code would be: **LSB-L3-ADG-Y-N**
